REPORTS ISSUED & PUBLICATION DATES

(on inside back cover)

COMMENTS FROM THE GOVERNOR

Montana's agricultural market place has changed over the years. We now sell our products in a world marketplace. For our agricultural businesses to be competitive, they must have the most reliable and accurate information available.

Today's agricultural industry is a complex and technologically advanced business which requires intense management with complex marketing and financial decisions made almost daily. In this 34th annual edition of *Montana Agricultural Statistics*, Montana producers will find the necessary information to make better decisions to keep them competitive in a dynamic and changing industry.

With the information provided in this publication (in printed and electronic format) and the support of all Montanans, our producers will continue to provide consumers with top quality products at reasonable prices.

Sincerely,

A handwritten signature in cursive script that reads "Marc Racicot". The signature is written in dark ink on a white background.

Marc Racicot
Governor

MESSAGE FROM THE DIRECTOR

Montana's agriculture producers face a multitude of major decisions each year. Decisions such as how many acres to seed, when to market their livestock, how to reduce input costs, and the list goes on. In order to make viable decisions, it is crucial that producers have the most recent information available. This 34th annual edition of *Montana Agricultural Statistics* provides such information. The information that is provided through the courtesy of Montana producers who are willing to share their data with the rest of the industry. My heartfelt thanks to those individuals.

As we approach the 21st century, current statistics and information become even more crucial in the decision making process. The department, in conjunction with the Agricultural Statistical Service, will continue to provide that information, be it in printed or electronic format.

We applaud Montana producers as they continue to be leaders in their industry.

Sincerely,

A handwritten signature in cursive script that reads "Ralph Peck". The signature is written in dark ink and is positioned above the printed name.

Ralph Peck
Director

NOTES FROM THE STATE STATISTICIAN

We are proud to present the thirty-fourth edition of *Montana Agricultural Statistics* to Montana's agricultural community. Montana's farmers, ranchers, and agribusinesses made this publication possible through their willingness to provide basic agricultural information.

As producers continue to expand their markets globally and add value to their products, the need for accurate, unbiased information becomes even more important. The Montana Agricultural Statistics Service works in cooperation with the Montana Department of Agriculture, the Montana

Wheat and Barley Committee, the Montana Alfalfa Seed Committee, Montana State University, and many other producer organizations to provide basic agricultural information. As of January 1997, Congress transferred the authority to collect the Agricultural Census from the Department of Commerce to our Agency. For the first time in history a USDA agency will conduct the Agricultural Census! We are excited about conducting the Agricultural Census and serving agriculture.

We have made the information in this bulletin available on Internet. Check out our homepage at www.nass.usda.gov/mt/homepage.htm. As you look over the bulletin, we would appreciate any comments or suggestions you have for improving this publication. Again, to everyone involved in Montana's agriculture, thanks for your continued support. Thanks to our staff of statisticians, technicians, and enumerators who are dedicated to providing Montana's number one industry, agriculture, with high quality statistics. A special thanks goes to Wendy Bruski who spent many hours preparing this publication for release and Bonnie Heller who put it on the Internet.

A handwritten signature in cursive script that reads "Peggy Stringer". The signature is written in dark ink and is positioned above the printed name and title.

Peggy Stringer
State Statistician

MONTANA DEPARTMENT OF AGRICULTURE

The Department of Agriculture, through the Director, is responsible for administration of a \$9.2 million annual budget with 100 full-time and 18 seasonal, full-time employees. The Director oversees the department's three divisions and six bureaus. The function of each division is summarized below.

Central Management Division performs technical, fiscal and administrative support functions for the department. Responsibilities of the division include activities for internal operations of the department.

Agricultural Sciences Division is responsible for the registration of 6,300 pesticide products; the training, certification and licensing of 1,600 commercial and government applicators, 1,600 operators, 475 pesticide dealers, and 8,000 private applicators. The division is also responsible for providing evaluation of pest management problems and programs; training and licensing of government and commercial pesticide applicators and dealers; and providing analytical laboratory and consultative services to other agencies and the public. In addition, the division is responsible for the administration and enforcement of regulatory laws controlling the production, manufacturing, and marketing of agricultural commodities exported from or distributed within Montana. The division investigates consumer complaints; performs technical expertise and licenses for 650 nurseries, 530 feed dealers, 250 fertilizer dealers, 325 seed dealers and 195 grain merchandisers. The division also registers some 4,500 commercial feed products, 1,400 fertilizers, and 5,000 bee yards.

The passage of the Montana Agricultural Chemical Ground Water Protection Act (1990) provides that the department will protect ground water and environment from impairment or degradation due to the use of agricultural chemicals.

The Vertebrate Pest Management program provides on-site demonstrations, educational materials and technical bulletins to assist producers in reducing damage caused by field rodents, birds, and other large mammals.

The Weed Management program is responsible for administering statewide efforts aimed at control and/or eradication of noxious and other undesirable weeds. The Noxious Weed Seed Free Forage Program provides a certification mechanism that allows producers to market various forage crops as being noxious weed seed free.

The Agricultural Development Division is responsible for administering programs directed at promoting and enhancing Montana agriculture. The Agriculture Finance program is responsible for making grants and lower interest rate loans for rural youth, rural youth organizations, and other qualified farmers and ranchers. The State Hail Insurance programs insures any type of crop grown in Montana from losses caused by hail damage.

The Marketing Program is responsible for market enhancement and development through direct market development activities, grants, seed capital loan investments in new/innovative marketing, and product development. Statewide agricultural statistics and projections are developed through a Federal/State cooperative agreement administered through the division, which are made available through a comprehensive agricultural statistics bulletin and grain movement summary along with other production, price and income reports. Research and market development efforts are promoted for alfalfa seed through the Montana Alfalfa Seed Committee.

The Montana State Grain Laboratory is located in Great Falls, operating the only official USDA-FGIS state grain grading laboratory in the state of Montana. The lab provides unbiased grain grading, analytical services, and oil seed analysis to the state's grain industry.

The division is responsible for promoting and encouraging intensive scientific and practical research in all phases of wheat and barley culture, production, and marketing under the guidelines and policies developed by the Montana Wheat and Barley Committee.

MONTANA CROP, LIVESTOCK, AND WEATHER DIGEST, 1996

January: There were some good snow falls during the month, and bitter cold temperatures were recorded. Snow cover of winter wheat fields was rated mostly fair to good. There was minimal wind damage reported on the wheat fields. Calving and lambing had just started by the end of the month. Grazing was rated 53% difficult and the rest closed.

February: The month started out very cold, but warmed up quickly the first week. Flooding was noted statewide during the first half of the month. By the end of the month some cold weather moved back in. Snow cover on winter wheat fields was mostly fair to good and wind damage was reported as minimal. Calving was 23% complete and lambing 14% complete by the end of the month. Grazing was rated mostly difficult.

March: The month started out cold, turned warmer, and ended cold. Most areas of the state received slightly above normal precipitation. Farmers were getting ready for April field work. Snow cover on winter wheat was rated mostly fair to good. Producers reported this year's calving and lambing season being an "ordeal" because of the long winter. Calving and lambing were 64% and 37% complete, respectively.

April: Spring planting was held up by wet conditions at the beginning of the month. Not until the last week in April were producers able to make good progress in seeding. By the end of the month 16% of the spring wheat and 18% of the barley were seeded. The winter wheat crop was rated mostly in good condition. Livestock producers started moving their cattle and sheep to summer ranges. Calving was 90% complete and lambing was 74% complete by April 30.

May: Seeding remained behind normal for most of the month. By the end of the month, 90% of the spring wheat and barley had been seeded. Cool weather hampered plant and pasture growth. Most areas of the state received ample precipitation. Spring wheat and barley conditions were rated 85% good to excellent, while winter wheat was rated nearly 60% good to excellent. Over half of the livestock had been moved to summer ranges.

June: Warm, dry weather allowed excellent growing conditions during the month. By the end of the month, though, many areas of the state were looking for some moisture. At month's end all small grains were rated about 60% good to excellent and the first cutting of alfalfa was 30% complete. Pasture and ranged feed condition was rated mostly good to excellent.

July: The month was marked by warm, dry conditions. Scattered showers in the third week helped some areas, but more moisture was needed. The small grain conditions started dropping due to the lack of moisture. Crop maturity was ahead of normal. Winter wheat harvest was 2% complete by the end of the month. The second cutting of alfalfa hay had just begun.

August: Continued warm, dry conditions covered the state. Small grain harvest was well ahead of normal. Winter wheat harvest was virtually done by the end of the month while the spring grain harvest was about 75% complete. There were numerous reports of grasshopper damage. Fire danger was reported as critical in many areas of the state. Pasture and range feed condition fell noticeably from the beginning of the month.

September: Spring wheat and barley harvest was nearly done by the middle of the month. Rains that came halfway into the month held up finishing small grain harvest. Winter wheat growers were finally able to make some headway seeding after the rains came. By the end of the month only 32% of the winter wheat had been seeded, well behind normal. Row crop harvest was progressing well by month's end. Livestock producers had moved over 30% of the cattle and sheep off summer ranges.

October: The first few weeks of October provided excellent conditions for winter wheat seeding. By the third week, seeding was virtually wrapped up. Unfortunately, there wasn't enough moisture in some areas, or it came too late, and producers ended up planting the second smallest winter wheat crop since 1951. Row crop harvest progressed well during the month. Livestock producers had moved over 80% of the sheep and lambs off summer ranges.

November: The month was cold and wet. Most of the state received heavy snow fall which provided good protection to the winter wheat crop. Just over 90% of the winter wheat crop had emerged before temperatures became too cold. The winter wheat condition was rated mostly fair to good. Nearly all the livestock had been taken off summer ranges. Grazing was rated mostly difficult to closed.

December: Most areas of the state received above normal precipitation. There was good snow cover on most of the winter wheat. Some wind damage was reported. Grazing was still rated mostly difficult to closed. Hay was reported to be in short supply because of heavy feeding so early in the season.

1/ This table gives the probability of a later date in the spring and an earlier date in the fall of the occurrence of temperatures as cold, or colder, than 36, 32, and 28 degrees Fahrenheit and the probable length of the freeze-free period relative to the same temperature threshold.

1/ Farm sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors of production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/ A positive value of inventory change represents current-year production not sold by December 1. A negative value is an offset to production from prior years included in current-year sales.

AGRICULTURE INDUSTRY OUTPACES OTHERS IN 1996

A comparison of selected Montana industries shows agriculture significantly outpaces other industry sectors. For the fourth year in a row, cash receipts from crops have increased. Crop receipts increased 15 percent from 1995 to \$1,230 million. Livestock cash receipts showed little improvement in 1996. For the third year in a row, cash receipts from crops surpassed livestock. Government payments increased 27 percent in 1996 to \$241 million.

Gross sales in other industries were up, except the mining sector. Receipts for non-residential travel increased \$24 million over 1995, jumping 2 percent. In the very volatile mining sectors, revenues decreased \$105.9 million, while gas and oil revenues increased \$64.7 million. Wood and paper products increased \$14 million.

MONTANA'S AGRICULTURAL EXPORTS INCREASE DRAMATICALLY IN 1996

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 1996 totaled \$850.2 million, \$379.6 million more than 1995. Wheat and wheat products are Montana's leading export, making up 88 percent of the State's agricultural exports. Exports of wheat and wheat products accounted for the largest increase during 1996 with \$349.8 million more than 1995. Feed grains and products increased \$23.4 million over 1995. Exports of Montana's live animals and meat were the only commodity classification that decreased, dropping \$1.7 million from 1995. Feed and fodder exports increased \$3 million and seeds exports increased \$5.2 million from 1995.

In fiscal 1996, the U.S. exported \$59.9 billion worth of agricultural commodities, \$5 billion more than 1995. Wheat and wheat products accounted for about \$2 billion in exports, increasing 35 percent over 1995. Nationally, wheat and wheat products make up 12 percent of all exports, 2 percent more than 1995.

Montana moved up to a third place ranking among states exporting wheat and wheat products in fiscal year 1996. North Dakota remained in the top position as a wheat exporter, followed by Kansas, Montana, Washington, and Minnesota. Considering the export of all products, California remained on top, followed by Iowa, Illinois, Texas, and Nebraska. Montana moved up from twenty-ninth to twenty-third position for export of all products.

AGRICULTURAL EXPORTS DROP IN 1997

U.S. agricultural exports reached \$52.9 billion for the first 11 months of fiscal year 1997, 5 percent below 1996. The cumulative value of bulk commodity exports is \$21.7 billion, 17 percent below fiscal 1996. Grains continue to show the largest year-to-year decrease, primarily reflecting lower prices after the high prices of 1996. Exports of wheat for the first 11 months of 1997 are \$3.6 billion, 42 percent below 1996, while corn exports, at \$5.7 billion, are down 28 percent. However, in August, exports of wheat and corn rose, reaching \$504 million and \$420 million, respectively, each well above July 1997 shipments.
